MUCH KICKING IN NEW FOOTBALL Walter Camp Says Chief Difficulty

Will Be in Watching Forward Pass. The views expressed regarding the new football rules of Walter Camp are of great interest. Mr. Camp says the chief difficulty in following the game

chief difficulty in following the game from the side lines this season will be in the case of the forward pass.

The spectator must see whether the man making the pass is at least five yards back of the scrimmage line and least one yard back. Incidentally he must determine whether the bail goes more than twenty yards past the scrimmage line, which is the outside limit of the forward pass. In other words, if the spectator expects to understand what is happening on the field, nearly every play has a fine shading—of restriction which must be carefully watched.

India the sac rules Mr. Camp see:

Under the new rules, Mr. Camp says, every team that expects to win must be possessed of a fairly good kicking game, for that, he declares, is the last reliance when other moves fail, and a reliance when other moves rail, and a team certainly must be able to push its opponents back up the field by means of a kick when it finds itself in difficulties. It is equally true, in his opinion, that the teams must find out how the rules are going to be interpreted and what the officials are going to rule Sept. 16. Cleveland again defeated the score being 6 to 5. Walker and re very effective until the eighth immer. on before they can consistently develop

their plays.

That the judges of play are to have unusual difficulty in performing their duties with satisfaction to themselves and others Mr. Camp feels sure. He

The danger is that the officials may ignore certain of the rules, only watching for the infractions which seem to them to be of the greatest import. This will result in a most complicated condition of offairs, because teams may play under one official one week and another the next, and unless all the officials cover all the rules and cover them alike there is no telling what the

Outcome of the Atom

A part of the theory touching the nature of matter is that the ions, which Bean Supper at Baptist Church Well are the constituents of atoms, are not only in constant motion, but that this energy is working toward a lower quality of matter; that is, that gold is developing toward copper or toward some other kind of metal of less value. So of silver and the diamond.

These precious metals never transmute upward, but always downward. The changes may not be observed in centuries but in millions of years they will manifest themselves. The disintegration of the atom and its transmutation into the base metals suggest two inferences—either the eradication of gold and other precious metals, or that the so-called baser metals are of greater value and use in the social

discovery that in the great plan of their families to follow later ature, copper and iron are more to e esteemed than gold or silver.—Ohio State Journal.

A Reliable Medicine—Not a Narcotic.

A Reliable Medicine-Not a Narcotic. A Reliable Medicine—Not a Narcetic,
Mrs. F. Marti. St. Joe, Mich., says
Foley's Honey and Tar saved her little boy's life. She writes: "Our little
boy contracted a severe bronchial tronble and as the doctor's medicine did
not cure him I gave him Foley's Honey
and Tar, in which I have great faith.
It cured the cough as well as the choking and gagging spells and he got well
in a short time. Foley's Honey and
Tar has many times saved us much
trouble, and we are never without it
in the house." Lee & Osgood Co.
